DEDAUB

Custom-Built Security Monitoring
White Glove Protection, Engineered for Your Protocol

Detect vulnerabilities, suspicious transactions, and protocol anomalies before they escalate

- **Monitor what matters**—your protocol's key actions and risks
- **Spot attacks early**—with real-time, analyst-vetted alerts
- **Adapt faster**—with ongoing updates as threats evolve

Tailored Protections

Expert-Driven Static Analysis
Our security engineers utilize Dedaub's advanced EVM decompiler and static analysis tools to uncover protocol-specific vulnerabilities.

Full-Spectrum Security Oversight
Dedaub monitoring goes beyond basic protection—covering governance, transaction integrity, and custom attack vectors, ensuring continuous protection.

Real-Time Incident Response
Get real-time, human-validated alerts delivered through your preferred communication channels.

Multi-Chain Monitoring
Custom-built agents track your protocol's transactions and high-value asset movements across multiple chains.

Custom-Built Monitoring Queries
We tailor monitoring to your protocol's assumptions and edge cases.

Proactive Threat Intelligence
Dedaub experts work with your team to anticipate threats—giving you time to act.
